of protecting the manufacturer and the employe. The mills operate 300 sets of machinery, the approximate value of which, including the buildings, is \$5,000,000. This is exclusive of stock. Each set of machinery gives employment to twenty persons, making the aggregats of employees 6,000, men, women and children. Estimating the average wages at \$30 a month for each employe, the mouthly pay-roll figures up \$180,000, and there is paid for labor in one year \$2,160,000 in this one industry. The value of the product is estimated at about \$7,000,000. This is for the knitting mills alone. Then there are the Harmony mills, a cotton industry, which employ about 4,000 persons and pay out for labor something like \$75,000 a month or \$900,000 a year. Add to this the amount paid for labor in the iron industries of the city, and then take into consideration the fact that free trade means practically the destruction of these intries of the city, and then take into consideration the fact that free trade means practically the destruction of these industries—or if it does not utterly wipe them out, it will reduce the wages of the mout, it will reduce the wages of the mouth of the mout the knitting mills and the Harmony mills give employment to about 10,000 persons, more than one-third of the en-tire population of the city. Every man, woman and child in the city is interested in the success of these industries. ANTI-CLEVELAND DEMOCRATS.

In the last official report of the statistician of the national bureau of ag-riculture it is shown that the average rate of wages paid farm hands in Massa chusets is \$30.66 per month, including board. The average weekly wages pai to men in the 24 principal manufactur-ing industries in that State \$11.85 per week,or \$47.40 per month of four weeks. In this connection it may be noted that these wages are 48, 7-25 per cent higher than are paid British laborers in the same industries. These figures are seected from the statistics relating t Massachusetts because it was to the peo-ple of that State that Mr. Wheeler was speaking. He attempted to influence the large manufacturing population of the old Bay State against protection by telling them that they are not prosperous, but that the really prosperous classes are those engaged in agriculture.
